App Concept LingoDeck

Diana Simonicova & Tijana Mijatovic

Goal of the LingoDeck App

- **Use case/The Problem:** Traditional memorisation of vocabulary lists rarely leads to long-term retention.
- **Target user:** students, language learners, and self-learners
- **The Goal:** Create a mobile tool that makes language learning easier.
- **The Solution:** LingoDeck provides a modern Android-based flashcard application to optimise learning sessions.
- **The Outcome:** Users spend less time studying, but remember more.

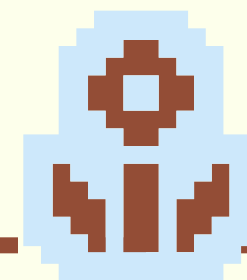

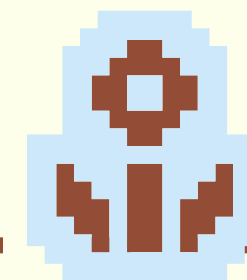

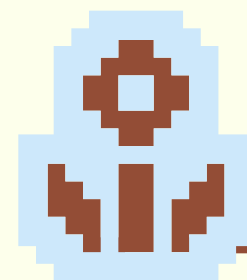

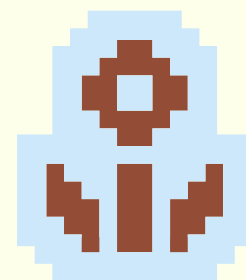

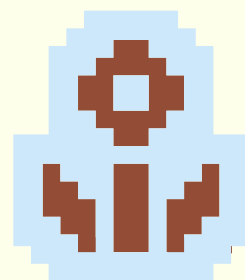

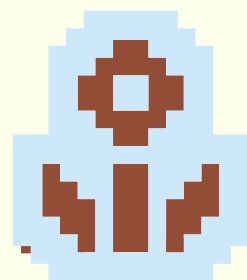

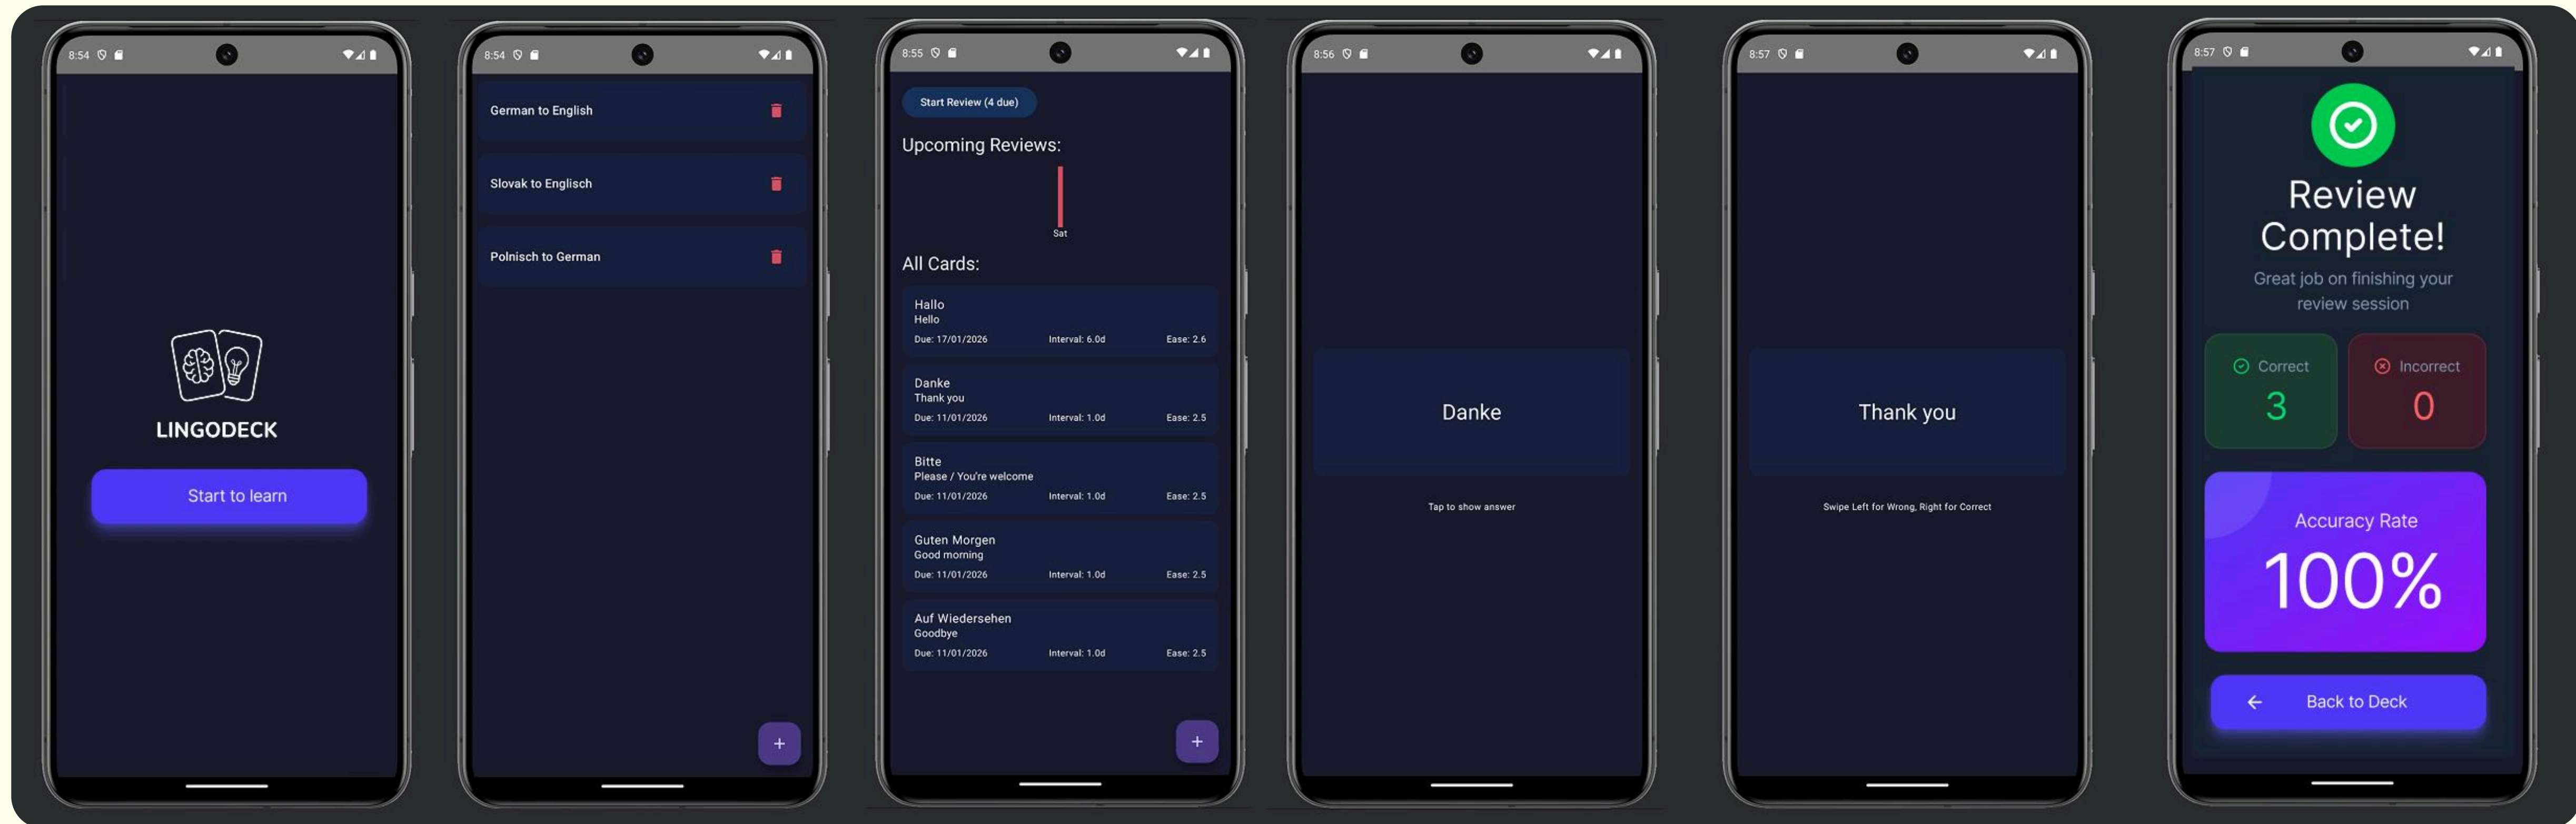

Hi-fi prototype

Core Mechanism: The Spaced Repetition System (SRS).

How it Works:

- The app tracks performance on every individual card.
- An algorithm calculates optimal review intervals.

Thank you!

Happy coding Happy learning
